### ***Election/Restrictions***

Applicant's election without traverse of group 2, claims 26-42 in Paper No. 8 is acknowledged.

Claims 1-25, 43-81 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 26-42 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 5,718,725 in view of 5,682,906. Stermann, et al '725 discloses a system for closed chest surgical intervention including all elements as claimed except for the specific recitation to the cutting means. Stermann, et al 5,682,906 is directed to a method for performing intracardiac procedures including the steps of insertion of a cutting means through a percutaneous intercostals penetration into the chest cavity for forming an internal

Art Unit: 3738

penetration in the wall of the patient's heart. To include a cutting means as an integral part of the system for closed chest surgical intervention of Sterman, et al '725, would have been obvious from the method steps of Sterman, et al '906 based upon surgical preparations and considerations.

Claim 27 see claims 8 and 9 of Sterman, et al '725.

Claims 28-42, see corresponding claims 2-12 of Sterman, et al '725.
